## **Waste Paper Transshipping via Shanghai, China**

Dear valued customer,

Please be advised that effective immediately, The General Administration of Customs PRC requires the full 10-digit Harmonized System code (HS) for all waste paper shipments transshipping via Shanghai, China. Please include the full 10-digit HS code on your bill of lading instructions.

Cargo will not be allowed to transship without the full 10-digit HS code (eight-digit code plus two-digit suffix). Failure to supply this information on your bill of lading instructions may cause cargo delays and storage costs at Shanghai. Any related charges will be for the account of the cargo and payable prior to cargo release at destination.

If you have any questions or concerns please contact our Export Documentation department at 1-800-609-3221 or via email at [KAMExdocumentation@us.kline.com](mailto:KAMExdocumentation@us.kline.com).

Thanks in advance for your cooperation and understanding.

Best regards,
