The U.S. dollar amounts are converted from the yen amount at ¥123.26=U.S.\$1.00. The exchange rate prevailing on June 30, 2007.

[Qualitative Information and Financial Statements]

1. Qualitative Information about Consolidated Operating Results

During the 1st Quarter of fiscal 2007 (April 1 through June 30, 2007), both the global and the Japanese economies grew favorably. In the U.S. economy, while there were some signs of slowing down in housing investment, domestic consumer spending was generally firm. The European countries also saw stable growth in their economies. In the Asian region, economies continued to expand due to brisk exports to Europe and steady growth of consumer spending and strong capital investment mainly in China and the countries in the Middle East. In the Japanese economy, both consumer spending and capital investment was firm, and exports continued to grow favorably.

As for environments surrounding the shipping industry, dry bulk market freight rates remained at a high level and containerships saw recovery in freight rates which continued to decline, backed up by strong cargo movements.

Under these circumstances, the “K” LINE Group deployed aggressive business operations in accordance with the policies under the “K” LINE Vision 2008⁺, and focused on expanding the scale of business. As a result, consolidated operating revenues for the 1st Quarter of fiscal 2007 accounted for ¥309.174 billion, an increase by ¥56.911 billion compared with the same period of the preceding year. Consolidated operating income was ¥32.306 billion, an increase by ¥22.289 billion compared with the same period last year, and ordinary income was ¥36.053 billion, an increase by ¥25.973 billion against the same period a year earlier. Consolidated net income for the 1st Quarter of fiscal 2007 was ¥25.804 billion, up by ¥16.101 billion on a year-on-year basis.

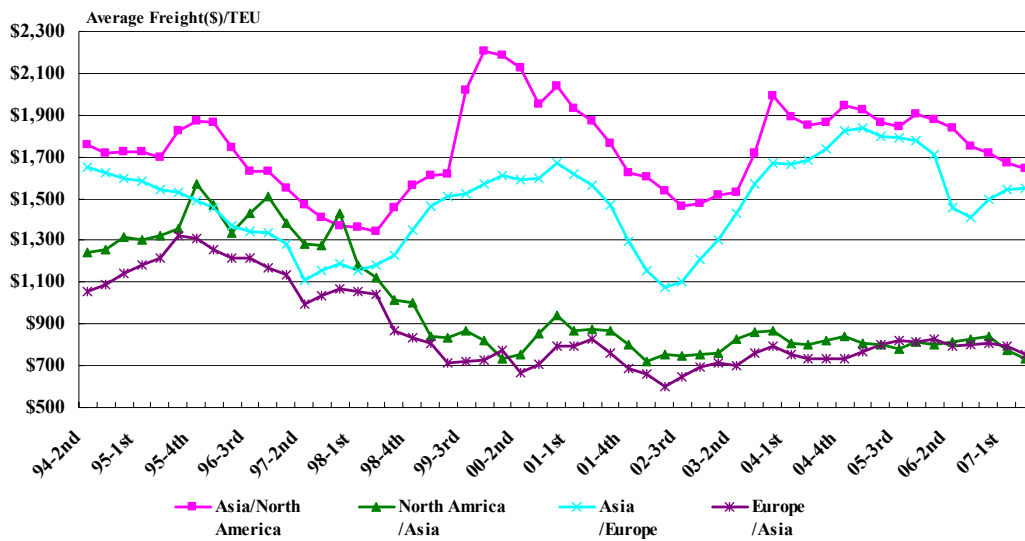

The following is summary of the activities by business sector.

1) Marine transportation

<Containership Business>

With decline of cargo movements of housing related products in the Asia/North America services, the growth of overall cargo movements temporarily slowed down at the beginning of the year. However, cargo movements of other products including apparels were strong. Consequently, supply-demand balance in the containership business remained at a stable level. The Company reinforced its transportation capacity by setting up new service to the Asia/U.S. East Coast from the middle of 2006, and as a result, tonnage movements increased by 18% on a year-on-year basis. The overall cargo movements in the European services grew about 20%, since cargo movements to the North European countries including Germany and France turned to a double-digit growth supported by stronger euro, in addition to continuously growing cargo movements in the Asia/Mediterranean and Eastern European services. The Company also strengthened its transportation capacity by launching newly built 8000TEU type ships, the largest containership in the Company, in the European services since October 2006. Consequently, tonnage movements increased by 20% on a year-on-year basis. Although transportation capacity increased sharply due to services of newly-built large-sized containerships and changes in ship operation of large-sized vessels from the North American service to the European service by other shipping companies, increases in demand exceeded those in transportation capacity and the balance between supply and demand remained high. The Company succeeded in restoring freight rates for the European services in April and for the North American services in May this year. As a result, operating results of the containership business for the 1st Quarter of fiscal 2007 exceeded initial projections, increasing both its operating revenues and profits against the same period last year.

Containerization International “Freight Rates Indicators”

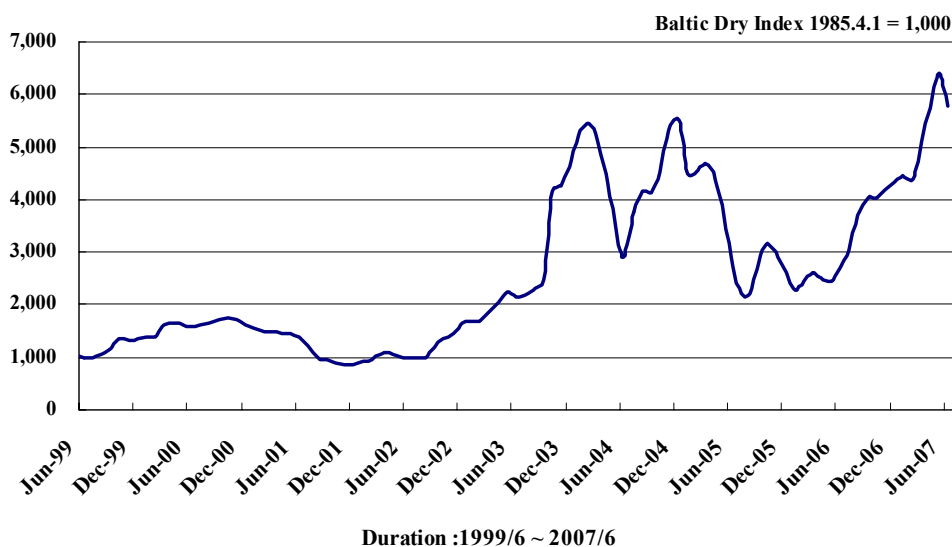

<Bulk Carrier and Car Carrier Business>

In the dry bulk transport, market freight rate for large-sized bulk carriers significantly exceeded those in the same period of the previous year. Those for small-sized bulk carriers remained on a high level supported by increases in volumes of Chinese exports of steel products. The transportation services of coal & iron ore, thermal coal, and woodchip and pulp secured stable profits by concluding a long-term transportation agreement with each customer, and at the same time, the other bulk carriers enjoyed sharply hiked spot freight rates. As a result, the overall bulk carrier business increased both its operating revenues and profits against the same period last year.

With respect to the car carrier business, performances of the business advanced favorably as the total number of cars transported by the Company increased 11% compared with the same period a year earlier, backed up by ever growing strong demand, commencement of new services connecting China, India, Middle East, and South Africa where demand is significantly growing, and efficient ship operations.

Under these favorable market conditions, operating results of the overall dry bulk carrier and car carrier business for the 1st Quarter of fiscal 2007 rose above initial projections due to accumulated business efforts including efficient operation of vessels in hand, increasing both its operating revenues and profits against the same period last year.

Baltic Dry Index

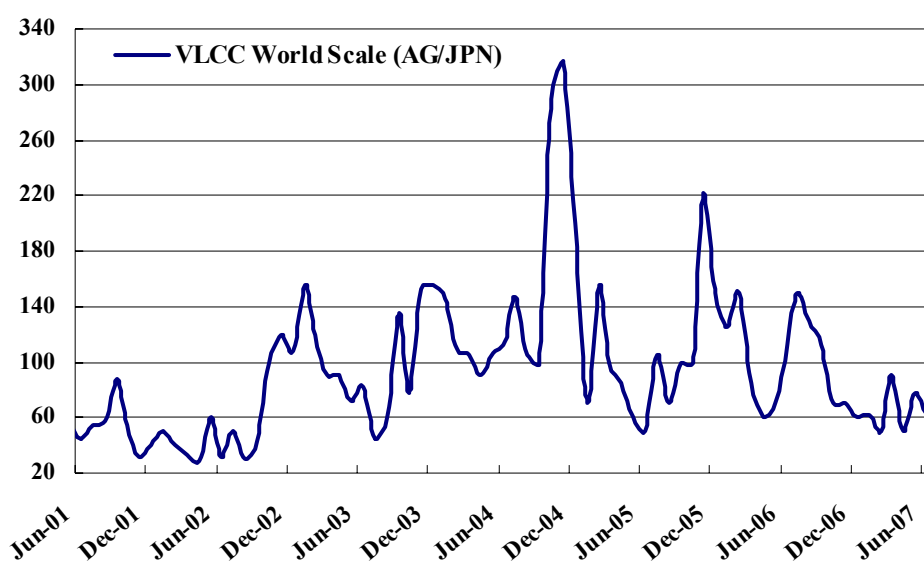

<Energy Transportation and Tanker Business>

As for LNG carriers, the fleet of LNG tankers consisting of 31 carriers including two newly built ones in the preceding year, operated smoothly on the whole, and secured stable profitability.

Tanker services' performances unfortunately went below the initial targets, since market prices of oil products temporarily softened due to a non-demand season for petroleum products of the northern hemisphere and increased transportation costs.

The overall operating revenues of the energy transportation and tanker business leveled off on a year-on-year basis on the whole, and its profit declined from the same period last year.

<Trends in tanker freight rate>

<Coastal shipping Business>

In the coastal shipping business, the Company secured stable transport volumes for specialized coastal vessels supported by domestic demand and substantially increased transport volumes including numbers of trucks and passengers in the Hachinohe/Tomakomai services, which were increased to four services per day. Consequently, operating revenues of this business for the 1st Quarter of fiscal 2007 exceeded those in the same period last year.

As a result, the overall operating revenues for marine transportation amounted to ¥273.177 billion, and operating income stood at ¥28.252 billion.

2) Freight Forwarding/Harbor Transportation

As for the comprehensive freight forwarding business, cargo movements steadily grew in both sea and air routes. In the harbor transportation services, cargo volumes increased helped by the expansion of the scale of the containership business. The overall operating revenues in this business were ¥30.788 billion, and operating income stood at ¥3.280 billion, supported by performances in the above.

3) As for other business not mentioned above, operating revenues amounted to ¥5.209 billion, and operating income was recorded at ¥0.700 billion.

2. Qualitative Information about Consolidated Financial Status

As of the end of the 1st Quarter of fiscal 2007, total assets increased by ¥35.801 billion to ¥936.240 billion compared with the end of the consolidated fiscal 2006, which are attributable mainly to an increase in construction in progress due to the Company's active promotion of grading up of its fleet of ships under the management plan "K" LINE Vision 2008⁺ and the expansion of unrealized holding gains among investment securities thanks to stock price advances.

As for liabilities, current liabilities decreased by ¥4.720 billion from the end of the preceding fiscal year to ¥226.210 billion due mainly to a decrease in short-term loans, and long-term liabilities increased ¥3.753 billion against the end of the previous year to ¥315.636 billion owing to increases in long-term debt and other long-term liabilities, despite a decrease in bonds due to conversion of convertible bonds. As a result, total liabilities decreased ¥0.966 billion against the end of fiscal 2006 to ¥541.847 billion.

As for net assets, shareholders' equity increased by ¥27.495 billion from the end of fiscal 2006 due to an increase in retained earnings, in addition to increases in common stock and additional paid-in capital resulted from conversion of convertible bonds, and valuation and translation adjustment increased by ¥9.305 billion from the end of fiscal 2006. As a result, total net assets increased ¥36.768 billion from the end of March 2007 to ¥394.393 billion.

3. Qualitative Information about Consolidated Prospects for Fiscal 2007

The containership business is expected to achieve the initial projections, since brisk cargo movements are expected in each service, mainly in the Asia/Europe and Mediterranean Sea services and the Asia/U.S. East Coast services, and supply and demand relationship is anticipated to be continuously tight in the coming peak-season. As for the bulk carrier business, demand for dry bulk carrier transport is forecasted to continue to further expand mainly in BRICs countries. In the car carrier business, cargo movements of completed cars in the marine transportation will be very powerful, supported by strong euro and lively demand in Central and South America and the Middle East. In the energy transportation and tanker business, market freight rates will be on a recovery trend and this business is expected to ensure stable profits, and all business segments of the Company are on a track to exceed the initial projections. In addition, the Company has decided to change accounting standard for posting of operating revenues of containership business from the current full-loading and sailing method to the percentage of complex transportation method from the 1st half of fiscal 2007. With this change of accounting standard, operating revenues, operating income and ordinary income for the 1st half of fiscal 2007 will decrease about ¥14.000 billion respectively, and net income will drop by around ¥8.500 billion. However, consolidated operating revenues, operating income, ordinary income and net income for the 1st half of fiscal 2007 are expected to exceed those previously published.

Regarding the 2nd half, business environment surrounding the shipping industry is expected to remain brisk, but on the other hand, negative factors including hikes of fuel oil prices and higher interest rates may pose as a problem. The Company revised its assumption for fuel oil price to US\$390/MT, up by US\$50/MT, by taking consideration recent upsurges of fuel oil prices. However, the Company has not revised initial assumptions for marine transportation markets and cargo movements, as well as assumptions for foreign exchange rates, and still maintains the initial assumptions. The Company will review comprehensively its operating results for fiscal 2007 at the end of the 1st half of fiscal 2007. Additionally, decreases in consolidated operating revenues and profits due to the change of accounting standard above will surface in the 1st half of fiscal 2007, and the Company expects no influences to occur from the change of accounting standard on operating results for the 2nd half. The Company expects consolidated operating results for fiscal 2007 to be ¥1,230.000 billion for operating revenues, ¥99.000 billion for operating income, ¥103.000 billion for ordinary income and ¥71.000 for net income, based on assumptions and situations in the above. As for non-consolidated operating results for fiscal 2007, operating revenues will be ¥970.000

billion, and operating income will be ¥60.000 billion. Non-consolidated ordinary income and net income will be ¥64.000 billion and ¥42.000 billion respectively.

In addition, preconditions for foreign exchange rates and fuel oil prices are:

2nd quarter: Exchange rate ¥120 per US dollar, fuel price US\$370 per ton

2nd half: Exchange rate ¥115 per US dollar, fuel price US\$390 per ton

With regard to dividend payment for fiscal 2007, the Company intends to pay ¥11 per share for both interim and year-end dividends (¥22 for full-term dividend).
