“K” LINE provides quarterly updates on the progress of its medium-term management plan through “K” Line With. Based on the FY2024 theme, **“Steady Steps Toward Further Growth,”** in addition to the video outlining the latest performance forecasts, it also focuses on three key aspects of the management plan: business strategy, functional strategy and capital policy. It offers detailed insights into the company’s initiatives and progress of the management plan, aiming to share this information with both internal and external stakeholders.

“K” LINE is implementing an offshore support vessel business for offshore wind power installations as part of its growth strategy to undertake low-carbon and decarbonization initiatives outlined in its medium-term management plan by leveraging “K” LINE Group’s unique strengths. This video details “K” LINE’s geotechnical survey in its offshore wind power supply chain\*. It showcases the company’s commitment to contributing to decarbonization for society by offering a variety of services chosen by customers while striving for sustainable growth and enhancing corporate value.

“K” LINE has posted the video on its official website in addition to “K” Line With to make outside stakeholders more aware of the Company’s activities. “K” LINE also aims to deepen understanding of the medium-term management plan among business sites on land and sea

within the Group, globally promote internal communication and information sharing, encourage a sense of solidarity as a source of the Group’s strength, and reinforce the foundation of its business operations.
