Kawasaki Kisen Kaisha, Ltd.

English version of Sustainability Report 2025 Published

Kawasaki Kisen Kaisha, Ltd. ("K" LINE) announces today that it has published the English version of Sustainability Report 2025.

Since 2021, "K" LINE has published its ESG DATA BOOK as a tool facilitating communication with stakeholders interested in the Group's ESG and sustainability management initiatives. The newly published Sustainability Report features a redesigned format that coherently and systematically presents the Group's policies, governance structure, initiatives, and related data about the environmental aspects, social aspects, and governance and economic aspects of the "K" LINE Group.

This year's Sustainability Report opens with a CEO Message that outlines top management's outlook on the Group's sustainability management activities. In addition, the report presents numerous policies that were revised during the 2025 fiscal year, specifically, the Charter of Conduct: "K" LINE Group Companies, which sets forth the Group's standards of behavior; the Sustainable Procurement Policy, which outlines the principles governing relationships between the Group and its business partners; and the Supplier Sustainability Guidelines,

which summarizes the items that the Group requests of its business partners in the promotion of sustainability throughout the supply chain.

Sustainability Report 2025 is available on the below section of "K" LINE's website.
